

First Jack

Instructions manual

[IM]-PKM-FIRST-JACK-V1

31/01/2025

1. Introduction

PKM First Jack is designed for easily lift rally cars out of assistance park for a reliable and quick wheel change so as to minimize time loose.

Specifications

Stroke (mm)	270
Operating weight (kg)	3.85
Pin diameter (mm)	20
Lifting speed (number of back and forth)	17
Height (mm3)	522
Max Load (kg)	700

2. Quality

The First Jack is fully assembled by hands in our factory in France.

The jacks are tested and approved at PKM Consulting factory before shipment. We load the jack under a metal frame with a scale on the floor and test if they keep the load after 15min.

Service
